

Proud Track Record of Reliable Working Solutions

Some of our solutions are simple, durable pieces of equipment that last for decades, even in demanding environments like abattoirs, powder coating lines and various automotive component production lines. Some of our more advanced high tech, high spec solutions are so "mission critical" that for reasons of commercial confidentiality, our clients have prohibited us from even describing what our solutions can do.

Our reputation remains our pride – based on over two decades of providing world class materials handling and logistics solutions.

So if you have materials to move, call us. Our Masterbuilt conveyors can make it happen.

"Masters Of Materials Movement"

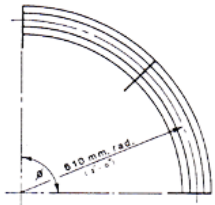

25 Year Heritage Of Advanced Materials Handling Excellence

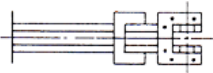

The performance and durability of Wainwright Masterbuilt Conveyor Systems is legendary.

From small businesses to ultra high tech, high security installations for major multinationals, the straight out value for money performance of our solutions, has seen us build a reputation that is second to none.

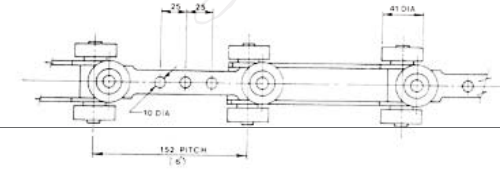

“Masters Of Materials Movement”

Our people love the challenge of making the right thing appear in the right place at the right time in the right way. And they have been making it happen for a diversity of material and applications – from agricultural products, minerals, delicate retail stock, foods, packaged goods, heavy and cumbersome bulky items, high precision systems, to ultra high tech industrial processes.

Wainwright

Complete Solutions That Keep On Performing

We can advise whether “off the shelf” is your best bet, or whether custom designed and built is the better solution for you.

We assess your needs, then design, build, test and install complete solutions, so you can be sure it all works as promised.

Our 24/7 expert teams can assess your needs on location and advise accordingly.

Our major product lines shown here are but a part of our diverse total material handling solutions.

Bi Planar Conveyor

Highly versatile, durable and cost effective. Can employ caterpillar, sprocket or pneumatic drive and incorporate a variety of sensor systems (e.g. weight, temperature etc). Overhead or floor mounted.

Belt Conveyor

Custom made to length, width, height, speed etc, using belt on rollers, belt on slide bed, or link bed design

Gravity Roller Conveyor

Standard units are supplied in 3m lengths to various widths and roller pitches. Custom units also available.

Powered Roller Conveyor

Powered by line shaft or chain and sprocket drives. Standard units supplied in 3m lengths to various widths and roller pitches. Custom units also available.

Skate Wheel Conveyor

Standard units supplied in 3m lengths to various widths and roller pitches. Custom units also available.

Pallet Transfer Conveyor

Custom built to specification.
